2D-MOT optimization · $s_0 = 1.3$

Global search · 51 configurations
10,000 trajectories per point

Refined search · 9 configurations
50,000 trajectories per configuration

Capture among Zeeman survivors. Background: illustrative interpolation; point labels: measured percentages. Error bars: 95% CI.
★ Selected by the highest lower 95% confidence bound in independent confirmation, not the highest search mean.
